

EYFS Personalised Curricular Goals

Respect

In EYFS we will teach all children to be respectful of all people within their community. We will do this through exploring festivals, celebrations and life in other countries and cultures. We will give children opportunities and real life experiences such as food tasting from other cultures and role play with traditional clothing.

Excellence

Throughout EYFS we will teach children to be resilient learners in order to prepare them for their school journey. Will teach children to persevere and keep trying when things are difficult to achieve their goal. We will do this though a range of quality learning opportunities and adult interactions.

Pride.

In EYFS we will celebrate children's successes and interests. We will build their confidence to try new things and explore new opportunities. We will also celebrate their indivial differences and support them to understand what makes them special.

Compassion

During the children's Early Years experience we hope to develop their personal, social and emotional needs so that they have all the foundations to develop positive attitudes to learning. We will teach children to be empathic to their peers, share, take turns and consider their own and others feelings around them.

Aspirations

In EYFS we will endeavour to develop children's oracy and language skills. We will teach new vocabulary and how to articulate themselves well when speaking in full sentences. This will provide the children with the valuable skills they need to achieve and work towards their future aspirations.
